

LearnX AI

- **AI-Powered Personalized Learning Platform**
- **AI-Powered Personalized Performance Analytics**

Team Details

- **Team Name: LearnX AI**
- **Members:**
 - **- Dharun Raj . S – Frontend & UI**
 - **- Praveen Kumar . K – Backend**
 - **- Adhesh . S – AI / Research**
 - **- Hari Hara Sudhan . S – AI / Research**
- **College: V.S.B College Of Engineering
Technical Campus**
- **Contact: 8122667041**
- **Problem Statement: Education & Edtech**

Problem Statement

- **Traditional education systems fail to adapt to individual student learning needs, causing poor engagement and outcomes.**
- **Traditional classroom and online learning methods rely heavily on one-size-fits-all content delivery, resulting in low student engagement, poor knowledge retention, and limited personalization to individual learning needs and pace.**

Current System Issues

- - **No personalization**
- - **Weak student- One-size-fits-all learning**
- **nts fall behind**
- - **No adaptive content**

Proposed Solution

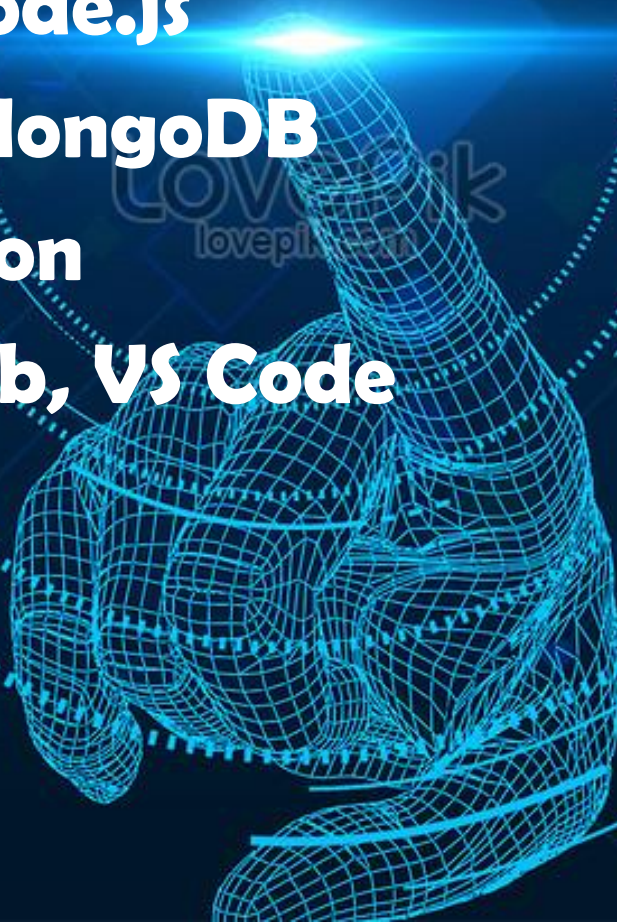

- **An AI-powered platform that analyzes student performance and provides personalized learning paths.**
- **Provides a clear and clarity way for all category of students to make their Learning Carrier more effective .**

Product Description

- **LearnX AI tracks learning behavior, recommends content, and adapts difficulty for better learning outcomes.**
- **Students will be having a assessment test. Where our AI will identifies the strength and weakness of the student.**
- **So according to the analytics our AI will adapt the recommendations automatically.**

Tech Stack

- **Frontend: HTML, CSS, React**
- **Backend: Node.js**
- **Database: MongoDB**
- **AI/ML: Python**
- **Tools: GitHub, VS Code**

Features & Future Scope

- **Features:**
 - - **Personalized learning**
 - - **Performance analytics**
- **Future Scope:**
 - - **Mobile app**
 - - **AI tutor**
 - - **Multi-language support**
